Career Objective

Computer Science undergraduate with a good understanding of Data Structures, Algorithms, Object-Oriented Programming, DBMS, and Software Engineering. Experienced in building full-stack web applications and ML-based solutions using Python, React.js, Node.js, and MongoDB. Passionate about solving programming problems and developing scalable software applications.

Technical Skills

Languages:	Python, C, JavaScript, SQL
Web Technologies:	HTML, CSS, React.js, Node.js, Express.js, Flask
Databases:	MongoDB, MySQL
AI/ML:	NLP, Machine Learning
Core CS:	Data Structures and Algorithms, OOP, DBMS, Operating Systems, REST APIs, CRUD Operations
Tools:	Git, Github

Education

Vignan's Foundation for Science Technology and Research	2023 – 2027
B.Tech in Computer Science Engineering	CGPA: 8.2/10
Sasi Junior College for Girls	2021 – 2023
Intermediate (MPC)	97.1%

Projects

Cyberbullying Detection Platform using NLP & Machine Learning	Jan 2026 – Mar 2026
Live Demo — Source Code <i>Python, NLP, Flask, Machine Learning, SQLite</i> - Engineered a scalable NLP-based cyberbullying detection system capable of classifying 3+ categories of harmful text - Applied TF-IDF vectorization and Logistic Regression for multi-class toxicity prediction on textual datasets - Implemented 3+ RESTful APIs using Flask for prediction, moderation, and history tracking workflows - Integrated SQLite database to store prediction history and moderation records.	
Real Estate Rental Platform	Nov 2025 – Dec 2025
Live Demo <i>React.js, Node.js, Express.js, MongoDB</i> - Designed a full-stack rental management platform supporting 3 user roles: Admin, Owner, and Tenant - Created RESTful backend APIs and implemented CRUD operations for 3+ property listing and booking workflows - Designed 3+ responsive user interfaces using React.js, HTML, and CSS for property management workflows - Implemented JWT authentication and role-based access control for secure user management and session handling	
Gamified Learning Platform for Rural Education	Aug 2024 – Jan 2025
Source Code <i>HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB</i> - Developed an offline-first gamified STEM learning platform using PWA technology - Designed interactive quizzes with levels, badges, and leaderboards - Implemented multilingual support and adaptive learning modules for rural students - Built a teacher dashboard with analytics to monitor student progress and performance	

Relevant Coursework

Data Structures and Algorithms, DBMS, Operating Systems, Object-Oriented Programming, Web Technologies

Training

Machine Learning Training – Internshala	2025
- Performed data preprocessing, feature engineering, and model evaluation using Python - Learned supervised learning, classification, regression, and model evaluation concepts - Executed machine learning workflows using Python and data preprocessing techniques	

Certifications

- Google Cloud Generative AI – Vertex AI, Prompt Engineering
- Machine Learning Training – Internshala
- Cambridge English B1 Certification
- NPTEL - E-Business, Public Speaking

Achievements

- Received an Appreciation Letter from the Department of Computer Science & Engineering for contributions to Alumni Club activities and student engagement.
- Participated in Smart India Hackathon (SIH) and ML Neutron Hackathon, developing AI/ML-based solutions in a collaborative team environment.
- Recognized as a Top Performer in Internshala Machine Learning Training with a 98% final assessment score.
